

Primary Care Provider Medicaid Attestation

In accordance with Section 1932 (b) (7) of the Social Security Act (as enacted by Section 4704 (a) of the 1997 Balanced Budget Act), the plan shall provide adequate assurances that it has the capacity to serve the expected Medicaid enrollment in a service area.

The Plan's contract with the Agency requires that the minimum standards for primary care physicians (PCP) be met to ensure adequate accessibility to all primary care services for all enrolled recipients at all ages, as follows:

- One Full Time Employed (FTE) PCP per 1,500 enrollees. The ratio may be increased by 750 enrollees for each FTE ARNP or FTE PA affiliated with a PCP.
- A full-time PCP may not have more than 3,000 active patients (All populations with Medicaid FFS, CMS Network, HMO, PSN, Medicare and Commercial coverage) enrolled in his/her panel.
- An active patient, as defined by the Agency for Health Care Administration is one that is seen by the provider a minimum of three (3) times per year.

I attest that my active patient load is no greater than 3,000 patients including all healthcare entities and lines of business.

I attest that I understand the above Medicaid guidelines and am in compliance with these established standards for my panel.
